FOR IMMEDIATE RELEASE

The Florence Morning News To Rejuvenate Their DGM 850 Press Drives

Florence, SC – February 2016 – Electronic Design Group Inc. (EDG) is pleased to announce their recent contract with BH Media-Florence Morning News for the renewal of their two single wide presses with new drives, masters and touchscreens.

Each press has two 125hp DC drives and motors. EDG is replacing the drives with industry leading digital DC drives, redundant masters and a touchscreen for each press.

The touchscreen will provide thorough drive status, unit status and logs for any events that stop the press so there are no “mystery stops”. These diagnostics are more comprehensive with the breaking out of stops and web breaks for each unit/folder within the scope of the project.

The tachometers on each motor are being replaced with maintenance free encoders. Tachometers are often a source of pain as they have mechanical moving parts which can cause intermittent speed issues.

This system comes with full remote support capabilities, a standard feature of all EDG systems. This provides the Customer essentially an extension to their maintenance department 24/7. EDG can connect from anywhere at any time to diagnose issues or assist in troubleshooting. The remote support PC is setup with all programming software, programs and schematics making it readily accessible to the Customer.

ABOUT EDG - Electronic Design Group is a focused team of experts with over 50 years' of Newspaper experience, specializing in automation and drives. EDG is committed to collaborating with clients to develop innovative technical solutions for various industrial applications. More information about EDG is available at www.electronicdesigngroup.ca.
